

30 October 1956

Subject: Proposal for Factory Training of Customer Technicians,
Lot II, Schedule II Equipment

Reference: (a) Conference 28-30 August 1956, Washington, D.C.,
GK, JMcD, RHP, BPM.
(b) Proposal for Lot II Equipment dated 28 August 1956
from RHP.
(c) Telecon 15 October 1956, JMcD to RHP.

Dear Sir:

This is to confirm, as requested by you in reference (c) telecon, that
Item 42 of Schedule II of reference (b) proposal is valid.

We herewith resubmit our proposal for the factory training of seven (7)
customer furnished technicians. Instructions will be conducted eight (8)
hours per day, five (5) days per week, Monday through Friday over a
nine (9) week schedule. Classes will be held in facilities immediately
adjacent to our Maintenance and Overhaul facility. Project Engineers,
Senior Engineers, Field Service Engineers and Production personnel
will be utilized to give the trainees the most complete subject coverage.
The students will be given schematic drawings, blueprints, charts and
miscellaneous training material during the course of the program.
These will be distributed as training aids and can be used in the future
as reference material. It is anticipated that Aerial Surveying Equipment
presently being supplied for operational use will be used and available
for this training program.

Invoices will be made monthly based upon percentage of completion of
contractor's obligation. The nine (9) week training program of seven (7)
customer technicians will be performed for a total amount of \$19,154.

We trust that this proposal meets with your favorable consideration.

Very truly yours,

HYCON MFG. COMPANY

Instrument Division
